English (B2)

Experience

2023 -

Defacto Technology

Software Developer

Leveraged Nats Message Broker for real-time messaging within the ERP system. Participated in the full-stack development of the Retail Master mobile app, including RESTful APIs with ASP.NET Core and a user interface using Flutter. Employed Couchbase for data storage and implemented various technologies like .Net Core, EF Core, Graylog, Azure Devops, Redis Cache, Vue Js. Applied methodologies such as Microservice Architecture and Design Patterns to optimize development processes.

2020 - 2023

Defacto Technology

Software Developer

Contributed to the transition of ERP structures to a microservice architecture, enhancing system scalability and maintainability. Developed a project utilizing Identity Server for authorization, ensuring secure access control.

2019 - 2020

Defacto Technology

Jr. Software Developer

I was handpicked as an MT from a pool of over 2000 applicants and embarked on my journey within the retail team. As a member of the team responsible for ERP, the backbone of merchandising operations across all Defacto stores, I played a pivotal role in managing desktop and mobile applications. My expertise encompassed a range of technologies, including .Net MVC, WCF, SQL, WPF, Entity Framework, Linq, Dapper, Angular Js, TFS, and Xamarin. Methodologies: Scrum, Agile, Unit Test, CI/CD, SOLID

2018 - 2019

Freelance

Jr. Software Developer

Development of desktop ERP program using C#. Design the Andon screen by using C# and MSSQL. Applications of database operations, for example creating stored procedure and improve performance.
